Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The election filed July 12, 2005 has been entered and made of record as paper no. 0705.

Applicant's election without traverse of claims 1-7 in the reply filed on July 12, 2005 is acknowledged.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakayama et al.

Nakayama discloses a nitride semiconductor substrate having a diameter of 45 mm which has a single layer structure having basic composition of GaN (Al can be zero as defined by Applicant).

In re claim 2, the nitride semiconductor layer in Nakayama is a self-supported substrate.

In re claim 3, the nitride semiconductor layer in Nakayama can have a thickness of 200 μm . Note paragraph [0017] of Nakayama.

In re claim 6, the nitride semiconductor layer in Nakayama is composed of single crystal. Note paragraph [0050] of Nakayama.

In re claims 4, 5, and 7, the claimed distribution of mass density and threading edge dislocation density are believed to be inherent characteristics of the nitride semiconductor layer disclosed by Nakayama.

The other references are cited to show other structures pertinent to Applicant's disclosure.
